Rudder - Bug #2274

rudder-inventory-endpoint can't run without rudder-server-root package because it misses logback.xml

2012-02-13 18:24 - Nicolas PERRON

Status:	Rejected		
Priority:	2		
Assignee:			
Category:	System integration		
Target version:	4.1.24		
Pull Request:		**Priority:**	50
Severity:	Minor - inconvenience | misleading | easy workaround	**Name check:**	
UX impact:		**Fix check:**	
User visibility:	Infrequent - complex configurations | third party integrations	**Regression:**	
Effort required:	Very Small		

Description

It seems that logback.xml is mandatory but isn't installed before rudder-webapp. Nevertheless, even if rudder-webapp is installed, endpoint doesn't respond.

```
#curl http://localhost:8080/endpoint/api/status/
<html>
<head>

History

#1 - 2012-02-13 18:24 - Nicolas PERRON

- Assignee changed from Nicolas PERRON to François ARMAND

#2 - 2012-02-15 15:45 - François ARMAND

- Status changed from New to 8

- Priority changed from 2 to 4

- Target version changed from 2.4.0~alpha5 to 2.4.0~alpha6

There is two URL to test (if "endpoint" is the root URL):

- /endpoint/api/status: only accept "GET", return 200 status, and a plain text response "OK"
- /endpoint/upload : only accept "POST", return status depending of the POST processing.

Beside that, I have no other idea - pair debugging needed.

#3 - 2012-04-02 09:28 - Jonathan CLARKE

- Assignee deleted (François ARMAND)

- Target version changed from 2.4.0~alpha6 to 24

This looks like a case for a "common" package.

To explain, we currently have various different Scala code repos, that in the end generate 2 WARs (rudder-webapp and rudder-inventory-endpoint). However, creating these 2 WARs involves compiling almost all the same code... and we have two different source packages for this, so do most things twice. This is ugly and inefficient... we should merge these two packages into one source package that creates 2 (or 3) binary packages.

Back to the common package: this source package could create a third package which contains any ressources needed by both rudder-webapp and rudder-inventory-endpoint, like logback.xml, and the dependency to jetty.

Obviously this is a major change, and can't happen in 2.4 now.

#4 - 2012-05-08 01:36 - Jonathan CLARKE

- Target version changed from 24 to Ideas (not version specific)

#5 - 2014-11-30 14:58 - Jonathan CLARKE

- Category changed from 26 to System integration

- Priority changed from 4 to 2

- Target version changed from Ideas (not version specific) to 2.11.5

I'm pretty sure the logback.xml file is now missing from the rudder-ldap component in multi-server setups too. This is the same bug.

#31 - 2016-12-05 15:22 - Vincent MEMBRÉ

- Target version changed from 3.1.17 to 3.1.18

#32 - 2017-02-17 23:22 - Vincent MEMBRÉ

- Target version changed from 3.1.18 to 3.1.19

#33 - 2017-03-24 17:04 - François ARMAND

- Subject changed from rudder-inventory-endpoint can't run without rudder-server-root package to rudder-inventory-endpoint can't run without rudder-server-root package because it misses logback.xml

- Severity set to Minor - inconvenience | misleading | easy workaround

- User visibility set to Infrequent - complex configurations | third party integrations

The workaround is to add the file at the expected place.
