

Rudder - Bug #10624

Rudder installation docs are misleading as to running rudder-init

2017-04-19 18:41 - Jonathan CLARKE

Status:	Released		
Priority:	N/A		
Assignee:	Nicolas CHARLES		
Category:	Documentation		
Target version:	3.1.20		
Pull Request:	https://github.com/Normation/rudder-doc/pull/309	Priority:	86
Severity:	Critical - prevents main use of Rudder no workaround data loss security	Name check:	
UX impact:		Fix check:	
User visibility:	Getting started - demo first install level 1 Techniques	Regression:	
Effort required:	Small		

Description

The current docs for a single platform, for example http://www.rudder-project.org/doc-4.1/_install_rudder_server.html#_install_rudder_root_server_on_debian_or_ubuntu, don't make it clear enough that one must run "rudder-init" at the end of the installation process.

I have myself been hit by this recently, and seen several users installing Rudder without success because that small final step was missing. This is made (much) worse by [#10567](#).

We **must** clarify this in the docs ASAP. Let's just duplicate the content of http://www.rudder-project.org/doc-4.1/_install_rudder_server.html#initial-config if that's what it takes.
