**Description**

During install of Rudder 4.2 (may happen on other version also), there's an error on rudder-upgrade script

```
+ for hook_file in 10_commit.sh 50_rudderify.sh 90_reload.sh
+ hook=ncf-hooks.d/post.write_technique.10_commit.sh
+ '[' -f ncf-hooks.d/post.write_technique.10_commit.sh ']'
+ git add ncf-hooks.d/post.write_technique.10_commit.sh
fatal: Not a git repository (or any of the parent directories): .git
```

indeed, /var/rudder/configuration-repository is not yet a git repository, so it fails
