Description

Les schémas LDAP sont en ASL:
rudder/rudder-core/src/main/resources/ldap/rudder.schema

En AGPL:
*/.scala
rudder/rudder-core/
pom.xml
src/main/resources/ldap/demo-data.ldif
src/main/resources/ldap/init-policy-server.ldif
src/main/resources/licenses.xml
src/main/resources/reportsInfo.xml
src/main/resources/reportsSchema.sql

rudder/rudder-web
src/main/webapp/WEB-INF/web.xml
pom.xml
src/main/resources/applicationContext-security.xml
src/main/resources/configuration.properties
src/main/resources/default_fr.properties
src/main/resources/default.properties
src/main/resources/demo-rudder-users.xml
src/main/resources/ldapObjectAndAttributes.properties
src/main/resources/logback.xml
src/main/webapp/javascript/arrondisIE.js
src/main/webapp/javascript/button.js
src/main/webapp/style/*.css

Les fichiers HTLM sont laissés sans licences (parcequ'il est complexe de leur en mettre une sans quelle soit transférée à chaque fois dans les pages produites).

Néanmoins, le fichier LICENSES devra en parler comme étant en AGPL avec exception.
