User visibility:	Operational - other Techniques | Technique editor | Rudder settings	**Regression:**	
Effort required:			

Description

Hi,
I have several problems with technical editor.

```
$ sudo ls /var/rudder/configuration-repository/ncf/50_techniques/
FusionInventory  SSMTP

$ sudo ls /var/rudder/configuration-repository/techniques/ncf_techniques/
category.xml  Enable_Backup_User  Enable_Backup_User_on_Debian_8  FusionInventory  SSMTP  VMWare_T
ools
```

I juste use "FusionInventory" and "SSMTP" techniques.
Others are deleted in Technique Editor but are always present in the Rudder Directives.
And in Rudder directive, I have 2 FusionInventory technique. (look screen "techniques list in rudder directives").

```
$ dpkg -l |grep rudder
ii  rudder-agent                     3.0.8-jessie0               amd64        Configuration managem
ent and audit tool - agent
ii  rudder-inventory-endpoint        3.0.8-jessie0               all          Configuration managem
ent and audit tool - service to receive inventory data
ii  rudder-inventory-ldap            3.0.8-jessie0               amd64        Configuration managem
ent and audit tool - OpenLDAP
ii  rudder-jetty                     3.0.8-jessie0               all          Configuration managem
ent and audit tool - Jetty application server
ii  rudder-plugin-advancedreporting 2.3.0~release-jessie0        all          Configuration managem
ent and audit tool - advanced reporting plugin
ii  rudder-reports                   3.0.8-jessie0               all          Configuration managem

Is duplicate of Rudder - Bug #5432: Deleted Technique from technique editor ...	**Resolved**

History

#1 - 2015-09-21 11:15 - Vincent MEMBRÉ

- Priority changed from N/A to 2

- Target version set to 2.11.14

Rudder techniques are not deleted when you delete them in technique editor.

You have to remove them from:

- The user technique library (go to techniques pages, click on each you want to delete, scrool down, click on delete button)
- The git directory with 'git rm -r'

```
cd /var/rudder/configuration-repository/techniques/ncf_techniques/
git rm -r Enable_Backup_User Enable_Backup_User_on_Debian_8 VMWare_Tools
```

We should add a default post-delete hook that remove the technique from repoisotry if possible (it may not work if some Directive based on those techniques exists ...)

#2 - 2015-09-21 15:35 - Florian Dhomps

Hi,

I tried on a test platform and it isn't enough.
The technique is still present in the directives.

Just create 'Test' Technique

```
root@rudder:/var/rudder/configuration-repository/techniques/ncf_techniques# ls ../../ncf/50_techniques/
Test

root@rudder:/var/rudder/configuration-repository/techniques/ncf_techniques# git status

On branch master

Untracked files:

  (use "git add <file>..." to include in what will be committed)

        ../../ncf/ncf.conf

nothing added to commit but untracked files present (use "git add" to track)
```

Remove With NCF

```
root@rudder:/var/rudder/configuration-repository/techniques/ncf_techniques# git status
On branch master

Changes not staged for commit:

  (use "git add/rm <file>..." to update what will be committed)

  (use "git checkout -- <file>..." to discard changes in working directory)

        deleted:    ../../ncf/50_techniques/Test/Test.cf
```

```
Untracked files:

  (use "git add <file>..." to include in what will be committed)

        ../../ncf/ncf.conf

no changes added to commit (use "git add" and/or "git commit -a")
```

Remove Rudder Technique

```
root@rudder:/var/rudder/configuration-repository/techniques/ncf_techniques# git rm -r Test
rm 'techniques/ncf_techniques/Test/1.0/expected_reports.csv'
rm 'techniques/ncf_techniques/Test/1.0/metadata.xml'

root@rudder:/var/rudder/configuration-repository/techniques/ncf_techniques# git status
On branch master

Changes to be committed:

  (use "git reset HEAD <file>..." to unstage)

        deleted:    Test/1.0/expected_reports.csv

        deleted:    Test/1.0/metadata.xml

Changes not staged for commit:

  (use "git add/rm <file>..." to update what will be committed)

  (use "git checkout -- <file>..." to discard changes in working directory)

        deleted:    ../../ncf/50_techniques/Test/Test.cf

Untracked files:

  (use "git add <file>..." to include in what will be committed)

        ../../ncf/ncf.conf
```

The technique is still present in the webapp after reboot server and manual technique update.

I am looking for other files 'Test'.

```
root@rudder:/var/rudder/configuration-repository/techniques/ncf_techniques# locate Test |grep var
```

```
/var/rudder/configuration-repository/directives/89636d5d-d552-4b72-b4ba-6655f4e5a6cc/Test
/var/rudder/configuration-repository/directives/89636d5d-d552-4b72-b4ba-6655f4e5a6cc/Test/activeTechniqueSetti
ngs.xml
rm -r /var/rudder/configuration-repository/directives/89636d5d-d552-4b72-b4ba-6655f4e5a6cc/Test
```

WebApp Directives.

```
  User Techniques
  - The technique with id ''Test'' is missing from repository
```

Thx
