

## Rudder - Bug #8017

### Adding an authorized network when "common-root" directive is missing seems to work, but actually fails

2016-03-01 13:19 - François ARMAND

<b>Status:</b> Released	
<b>Priority:</b> 2	
<b>Assignee:</b> Nicolas CHARLES	
<b>Category:</b> Web - Maintenance	
<b>Target version:</b> 3.1.20	
<b>Target version (plugin):</b>	<b>Effort required:</b> Very Small
<b>Severity:</b> Major - prevents use of part of Rudder   no simple workaround	<b>Pull Request:</b> <a href="https://github.com/Normation/rudder/pull/1649">https://github.com/Normation/rudder/pull/1649</a>
<b>User visibility:</b> Getting started - demo   first install   level 1 Techniques	<b>Priority:</b> 60
<b>Description</b>	
When "common-root" directive is missing, for example because rudder-init was not done correctly, you can still go to the admin page in Rudder and add authorized networks. Saving seems to work (perhaps due to <a href="#">#7144</a> ).	
At least seen in 3.1, perhaps happening before.

François: shouldn't we have a 404 page now in this case ?

**#17 - 2017-04-27 12:26 - François ARMAND**

- Effort required set to Very Small

- Priority changed from 45 to 60

That entry is not checked for, but you are right: we should be more precise about what is checked regarding the run of rudder-init, and will add it.
