User visibility:	Getting started - demo | first install | level 1 Techniques	**Regression:**	
Effort required:			

Description

if the group already exists
"option Users included in the group (optional)"
doesn't work UNLESS you also select enforce the content of the group

Fixes #8739: group management technique doesn't ensure optional user is in group

History

#1 - 2016-08-12 18:01 - Alexis Mousset

- Target version set to 2.11.24

Indeed, the "Enforce the group content" boolean is used as a condition to edit the group content.

We should have:

- an option to append the users list to the group
- an option to enforce only these users.

We should also rename the body named "groups_file_append" that does not append users but set the whole content of the group.

- User visibility changed from Operational - other Techniques | Technique editor | Rudder settings to Getting started - demo | first install | level 1 Techniques

- Priority changed from 0 to 31

The behavior is the expected one, but the label for the checkbox must be explicit about what it does (obviously, it is not).

- Translation missing: en.field_tag_list set to Sponsored

- Severity changed from Minor - inconvenience | misleading | easy workaround to Major - prevents use of part of Rudder | no simple workaround

- Priority changed from 42 to 79

There is in fact no easy workaround to be able to ensure that an user is in a group.
